Anti-RPS9 Rabbit Polyclonal Antibody

Catalog #: 50624

Aliases

40S ribosomal protein S9

Background

Gene Name: RPS9 NCBI Gene Entry: 6203 UniProt Entry: P46781

Application Information

Molecular Weight: Predicted, 22 kDa; observed, 23 kDa

Clonality: Rabbit polyclonal antibody

Species Reactivity: Human, mouse, rat, bovine, pig

Applications Tested: Western blotting (WB), immunohistochemistry (IHC), immunocytochemistry

(IC), flow cytometry (FCM)

Immunogen

A synthesized peptide derived from human RPS9

Isotype

Rabbit IgG

Storage Buffer

Supplied in PBS (pH 7.3) containing 30% glycerol, and 0.01% sodium azide.

Storage

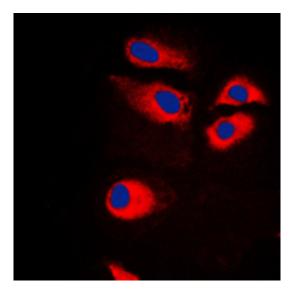

Store at -20 °C for one year.

Recommended Dilutions

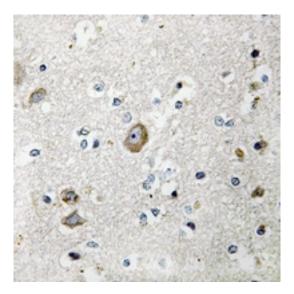

Western Blotting (WB): 1:500-1:1,000 Immunohistochemistry (IHC): 1:50-1:100 Immunocytochemistry (IC): 1:50-1:200 Flow Cytometry (FCM): 1:100-1:200

Note: This product is for research use only.

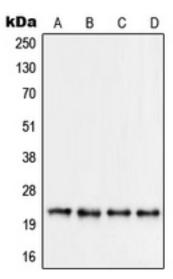

Validation Data

Immunocytochemical analysis of RPS9 staining in Jurkat cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark. DAPI was used to stain the cell nuclei (blue).

Immunohistochemical analysis of RPS9 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Western blotting analysis of RPS9 expression in Jurkat (A), HEK293 (B), HeLa (C), NIH3T3 (D) whole cell lysates.
