

Human EMD Knockdown Cell Line (WB-Validated)

Catalog #: C61962

Aliases

EMD; Emerin; STA; LEMD5; LEM Domain Containing 5; EDMD; Emery-Dreifuss Muscular Dystrophy

Background

Gene Name: EMD

NCBI Gene Entry: [2010](#)

Storage

Store at liquid nitrogen for 1 year.

Kit Components

1. Human EMD Knockdown Cell Line (Wb-Validated)
2. Wild-type cell line

Parental Cell Line

Human cell line supplied by the client

Validation Methods

RT-qPCR, Western blotting (WB)

Shipping

Shipped on Dry Ice.

Instructions For Use

This knockdown cell line should be paired with wild-type cell line for use.

Note: This product is for research use only.

Genotype	Ct Value
Wild-Type	19.00
Knock-Down	20.93
$\Delta Ct (Ct_{KD} - Ct_{WT})$	1.93
% mRNA Reduction	↓ 74%

RT-qPCR analysis. HeLa cells were infected with EMD-specific shRNA lentiviral particles, total RNA was extracted from wild-type and knockdown cells, RT-qPCR was performed using gene-specific primers. $\Delta Ct (Ct_{KD} - Ct_{WT})$ was used to calculate mRNA reduction (%) between wild-type and knockdown cells using the following formula: $(1 - 1/2^{\Delta Ct}) \times 100\%$.

Western blotting analysis. EMD protein expression in wild-type (WT) and shRNA knockdown (KD) HeLa cells was detected using Western blotting. β -Tubulin served as a loading control. The blots were incubated with primary antibodies (Cat#61962, 1:5,000) against EMD and β -Tubulin, respectively, followed by incubating with HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000). Images were developed using FeQ™ ECL Substrate Kit (Cat#226).
