

Human GYPC Knockdown Cell Line (WB-Validated)

Catalog #: C62182

Aliases

GYPC; Glycophorin C (Gerbich Blood Group); GPC; Sialoglycoprotein D; CD236R; CD236; GYPD; GPD; Ge; Glycoprotein Beta; Gerbich Antigen; Glycoconnectin; Glycophorin-C; Glycophorin-D; PAS-2'; Gerbich Blood Group Antigen; Glycophorin D; CD236 Antigen; PAS-2; GLPC

Background

Gene Name: GYPC

NCBI Gene Entry: 2995

Storage

Store at liquid nitrogen for 1 year.

Kit Components

1. Human GYPC Knockdown Cell Line (Wb-Validated)
2. Wild-type cell line

Parental Cell Line

Human cell line supplied by the client

Validation Methods

RT-qPCR, Western blotting (WB)

Shipping

Shipped on Dry Ice.

Instructions For Use

This knockdown cell line should be paired with wild-type cell line for use.

Note: This product is for research use only.

RT-qPCR analysis. HeLa cells were infected with GYPC-specific shRNA lentiviral particles, total RNA was extracted from wild-type and knockdown cells, RT-qPCR was performed using gene-specific primers. $\Delta Ct (Ct_{KD}-Ct_{WT})$ was used to calculate mRNA reduction (%) between wild-type and knockdown cells using the following formula: $(1-1/2^{\Delta Ct}) \times 100\%$.

Western blotting analysis. GYPC protein expression in wild-type (WT) and shRNA knockdown (KD) HeLa cells was detected using Western blotting. Hsp90 α served as a loading control. The blots were incubated with primary antibodies against GYPC and Hsp90 α , respectively, followed by incubating with HRP-conjugated goat anti-rabbit secondary antibody. Images were developed using FeQ™ ECL Substrate Kit.
