

Human MSN Knockdown Cell Line (WB-Validated)

Catalog #: C62313

Aliases

Moesin; Membrane-Organizing Extension Spike Protein; Epididymis Luminal Protein 70; HEL70; IMD50

Background

Gene Name: MSN

NCBI Gene Entry: [4478](#)

Storage

Store at liquid nitrogen for 1 year.

Kit Components

1. Human MSN Knockdown Cell Line (Wb-Validated)
2. Wild-type cell line

Parental Cell Line

Human cell line supplied by the client

Validation Methods

RT-qPCR, Western blotting (WB)

Shipping

Shipped on Dry Ice.

Instructions For Use

This knockdown cell line should be paired with wild-type cell line for use.

Note: This product is for research use only.

Validation Data

Human MSN Knockdown Cell Line (WB-Validated)

Genotype	Ct Value
Wild-Type	17.87
Knock-Down	20.83
$\Delta Ct (Ct_{KD}-Ct_{WT})$	2.96
% mRNA Reduction	↓ 87%

RT-qPCR analysis. HeLa cells were infected with MSN-specific shRNA lentiviral particles, total RNA was extracted from wild-type and knockdown cells, RT-qPCR was performed using gene-specific primers. $\Delta Ct (Ct_{KD}-Ct_{WT})$ was used to calculate mRNA reduction (%) between wild-type and knockdown cells using the following formula: $(1-1/2^{\Delta Ct}) \times 100\%$.

Western blotting analysis. MSN protein expression in wild-type (WT) and shRNA knockdown (KD) HeLa cells was detected using Western blotting. Hsp90 α served as a loading control. The blots were incubated with primary antibodies (Cat#62313, 1:5,000) against MSN and Hsp90 α , respectively, followed by incubating with HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000). Images were developed using FeQ™ ECL Substrate Kit (Cat#226).
