

Human GALM Knockdown Cell Line (WB-Validated)

Catalog #: C64831

Aliases

GALM; Galactose Mutarotase; Aldose 1-Epimerase; Aldose Mutarotase; Galactomutarotase; EC 5.1.3.3; Epididymis Secretory Sperm Binding Protein Li 63p; Galactose Enzyme Activator; HEL-S-63p; BLOCK25; GALAC4; GLAT; IBD1

Background

Gene Name: GALM

NCBI Gene Entry: [130589](#)

Storage

Store at liquid nitrogen for 1 year.

Kit Components

1. Human GALM Knockdown Cell Line (Wb-Validated)
2. Wild-type cell line

Parental Cell Line

Human cell line supplied by the client

Validation Methods

RT-qPCR, Western blotting (WB)

Shipping

Shipped on Dry Ice.

Instructions For Use

This knockdown cell line should be paired with wild-type cell line for use.

Note: This product is for research use only.

RT-qPCR analysis. HeLa cells were infected with GALM-specific shRNA lentiviral particles, total RNA was extracted from wild-type and knockdown cells, RT-qPCR was performed using gene-specific primers. $\Delta Ct (Ct_{KD} - Ct_{WT})$ was used to calculate mRNA reduction (%) between wild-type and knockdown cells using the following formula: $(1 - 1/2^{\Delta Ct}) \times 100\%$.

Western blotting analysis. GALM protein expression in wild-type (WT) and shRNA knockdown (KD) HeLa cells was detected using Western blotting. Hsp90 α served as a loading control. The blots were incubated with primary antibodies against GALM and Hsp90 α, respectively, followed by incubating with HRP-conjugated goat anti-mouse secondary antibody. Images were developed using FeQ™ ECL Substrate Kit.
