Anti-Phospho-FANCA (S1149) Rabbit Polyclonal Antibody

Catalog #: U0194

Aliases

FAA; FACA; FANCH; Fanconi anemia group A protein; Protein FACA

Background

Gene Name: FANCA NCBI Gene Entry: 2175 UniProt Entry: O15360

Application Information

Molecular Weight: Predicted, 162 kDa; observed, 163 kDa

Clonality: Rabbit polyclonal antibody Species Reactivity: Human, mouse, rat

Applications Tested: Western blotting (WB), immunohistochemistry (IHC), immunocytochemistry

(IC)

Immunogen

A synthesized peptide derived from human Phospho-FANCA (S1149)

Isotype

Rabbit IgG

Storage Buffer

Supplied in PBS (pH 7.3) containing 30% glycerol, and 0.01% sodium azide.

Storage

Store at -20 °C for one year.

Recommended Dilutions

Western Blotting (WB): 1:500-1:1,000 Immunohistochemistry (IHC): 1:50-1:100 Immunocytochemistry (IC): 1:50-1:200

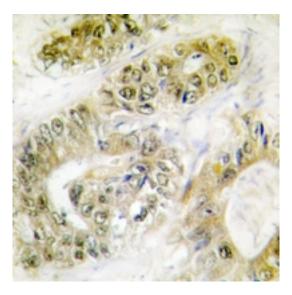

Note: This product is for research use only.

Validation Data

Anti-Phospho-FANCA (S1149) Rabbit Polyclonal Antibody

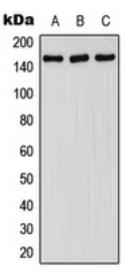

Immunocytochemical analysis of FANCA (Phospho-S1149) staining in HepG2 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

Immunohistochemical analysis of FANCA (Phospho-S1149) staining in human colon cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Anti-Phospho-FANCA (S1149) Rabbit Polyclonal Antibody

Western blotting analysis of FANCA (Phospho-S1149) expression in HepG2 EGF-treated (A), SP2/0 EGF-treated (B), H9C2 EGF-treated (C) whole cell lysates.
